Section 1 : Coding

1. Problem Statement

Ravi is developing a student registration system for a college. To efficiently store and manage the student IDs, he decides to implement a doubly linked list where each node represents a student's ID.

In this system, each student's ID is stored sequentially, and the system needs to display all registered student IDs in the order they were entered.

Implement a program that creates a doubly linked list, inserts student IDs, and displays them in the same order.

Input Format

The first line contains an integer N the number of student IDs.

The second line contains N space-separated integers representing the student IDs.

Output Format

The output should display the single line containing N space-separated integers representing the student IDs stored in the doubly linked list.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 5

10 20 30 40 50

Output: 10 20 30 40 50

Answer

```
#include <stdio.h>
```

```
#include <stdlib.h>
```

```
// Define the Node structure
```

```
typedef struct Node {
```

```
    int data;
```

```
    struct Node* prev;
```

```
    struct Node* next;
```

```
} Node;
```

```
Node* head = NULL;
```

```
Node* tail = NULL;
```

```
// Function to insert at the end of the list
```

```
void insertAtEnd(int data) {
```

```
    Node* new_node = (Node*)malloc(sizeof(Node));
```

```
    new_node->data = data;
```

```
    new_node->prev = NULL;
```

```
    new_node->next = NULL;
```

```
    if (head == NULL) {
```

```
        head = tail = new_node;
```

```
    } else {
```

```
        tail->next = new_node;
```

```
new_node->prev = tail;
tail = new_node;
}
```

```
// Function to display the list
void display() {
    Node* temp = head;
    while (temp != NULL) {
        printf("%d ", temp->data);
        temp = temp->next;
    }
    printf("\n");
}
```

```
// Main function
int main() {
    int N, value;
    scanf("%d", &N);

    for (int i = 0; i < N; i++) {
        scanf("%d", &value);
        insertAtEnd(value);
    }

    display();
    return 0;
}
```

Status : Correct

Marks : 10/10
